

## INCLINOMETERS AND PRECISION LEVELS

Irrespective of whether they are spirit or electronic inclinometers, all precision levels are based on the same perfectly reliable reference but also cost-free: the centre of the earth's gravity.

Under the force of gravity, the gas bubble in the liquid or the pendulum inclines itself according to this natural physical principle.

The position of the pendulum with respect to the measuring faces of the instrument body can then be measured. Based on this perfect principle, these instruments offer a great number of measuring applications of high precision. The horizontal and vertical positioning of the measuring faces enable the detection of form errors in the geometrical elements on the workpiece to be measured.
These errors often result from deviations in straightness, flatness, position, parallelism and squareness.

Indication of values may vary depending on the type of level, the values typically displayed are:

- inclination (mm/m or in/10 in);
- radian in mrad;
- decimal angle (e.g. 12,370);
- sexagesimal angle in degrees ( ${ }^{\circ}$ ), minutes ( $\left(^{\prime}\right.$ ) and seconds (") e.g. $15^{\circ} 30^{\prime} 45^{\prime \prime}$.

## INCLINOMETERS AND LEVELS

The TESA inclinometers and levels meet the most demanding applications not only in the machine building sector but also in the civil construction sector.

## Electronic Inclinometer - TESA CLINOBEVEL 1 USB

Compact universal instrument for direct and differential measurements - Measuring range $\pm 45^{\circ}$ with display of measured angles or inclinations - Reinforced aluminium housing, eloxide surface - Large digital display for error free interpretation of readings.
Supplied with CLINOSOFT software permitting the visualisation and storage of measurements as well as the USB cable to host computer.

Multiple applications are possible, notably the measurement of 2 flat surfaces by comparing the measured values with the help of 2 instruments. Automatic generation of inspection reports using Microsoft EXCEL spreadsheet software.

CLINOSOFT Software

Measuring functions: $A ; B ; A+B ; A-B$

CLINOSOFT Software

CLINOBEVEL 1-USB, can be used on its 4 faces.

TESA CLINOBEVEL 2 Electronic Inclinometer
Portable precision inclinometer.

Measuring range $\pm 45^{\circ}$ with indication of angle or inclination Integrated temperature compensation 2 prismatic measuring faces. Spirit level integrated in transverse direction to eliminate "twist" error. Simple and rapid calibration: correction of gain by the 3-point method and software integrated in the instrument.
Microprocessor-based features for display setting and instrument adjustment.

The CLINOBEVEL 2 can be used on its two reference faces.
It can also be connected to a second CLINOBEVEL 2 instrument for a differential measurement (Comparative): one of the two instruments operates as a reference without the need to connect to a computer.
The integrated RS 232 interface enables the connection of the instrument to a computer.
Magnetic inserts can be integrated on the measuring faces on request as a special execution.

When 2 CLINOBEVEL 2 are connected, one of the instruments becomes the reference

## TESA MICROBEVEL 1 Inclinometer

TESA MICROBEVEL 1 is particularly suited for measuring slightly inclined surfaces such as the measuring of flatness of surfaces or the geometrical characteristics (deviation, rotation etc.) of a machine tool.
Suited for operation under the most rugged conditions., protected by an aluminium case.
Power supplied by a single standard battery AA 1,5 V for at least 100 hours of operation.

## TESA NIVELTRONIC Electronic Levels with Analogue Display and Integrated Galvanometer

Electronic levels with analogue display and integrated galvanometer. These instruments are known for a remarkable stability at zero point. They are used for the inspection and alignment of horizontal and vertical surfaces. They are also suitable for the measurement of slight inclinations, specially for the inspection of flatness of granite surface plates.

The square model is particularly suited for the measurement of flat or cylindrical parts thanks to its prismatic base.

## TESA Crossed Spirit Levels - for Assembly

For the inspection and alignment of flat surfaces.

The 2 vials permit a simultaneous alignment in the X and Y axes. The level can be screwed on to a surface.

Model B: Circular level with cross vials, 3-point mounting. Aluminium alloy protection case, anodised.

Model C: T-shaped level with cross vials, 2-point mounting. Manually lapped measuring base to ensure a much higher precision of the level.

## TESA Precision Spirit Levels

For checking and aligning flat or cylindrical surfaces in the horizontal position.

With an ajustment system for zero point and "twist" error.
Prismatic measuring base, manually lapped finish, enabling a higher precision for the level.
Insulating grip in wood essential for reducing heat transfer due to manual handling.

## TESA Precision Spirit Levels with a Frame

For checking and aligning flat or cylindrical surfaces in horizontal and vertical positions.
Instrument features: 4 measuring faces, 2 prismatic faces (shafts $\emptyset 17$ to 135 mm ) et 2 smooth flat faces.
With adjustment system for zero point and "twist" error.
Longitudinal vial with sensitivity of 0,02 to $0,1 \mathrm{~mm} / \mathrm{m}$, depending on the model.
Side viewing slots for an excellent visibility of the top and side of the main vial.
Cross vial with sensitivity of 2-5 mm/m for easy adjustment.
3 insulating grips to avoid any thermal transfer.
$4 \times 90^{\circ}$ flat
$4 \times 90^{\circ}$ lat
measuring faces, machined together 20 of them with V-shape grooves

Hardened and ground steel cross vials

## TESA Precision Spirit Levels, Square Models with Magnetic Inserts

For inspecting and aligning flat or cylindrical surfaces in horizontal and vertical positions.
Instrument features: 2 prismatic faces (shafts $\emptyset 19$ to 108 mm ) with the vertical measuring face having magnetic inserts.
Equipped with an adjustment system for zero point and "twist" error.
Longitudinal vial with a sensitivity from 0,02 to $0,05 \mathrm{~mm} / \mathrm{m}$, depending on the model.
Cross vial with a sensitivity of $2-5 \mathrm{~mm} / \mathrm{m}$ for an easy adjustment.
A quality wooden grip reduces thermal transfer during manual handling.

## TESA Precision Spirit Level with Micrometric Adjustment

Precision spirit level with micrometer adjustment.
For the measurement of inclinations from -20 to $+4 \mathrm{~mm} / \mathrm{m}$.
1 division $=0,02 \mathrm{~mm} / \mathrm{m}$
Instrument features:
+1 micrometer rotation $=+2 \mathrm{~mm} / \mathrm{m}$ (100 divisions)
+2 micrometer rotations $=+4 \mathrm{~mm} / \mathrm{m}$

- 10 micrometer rotations $=-20 \mathrm{~mm} / \mathrm{m}$

Prismatic measuring face (shafts $\emptyset 19$ to 120 mm ).
Longitudinal vial with sensitivity of $0,02 \mathrm{~mm} / \mathrm{m}$
Cross vial with sensitivity of $2-5 \mathrm{~mm} / \mathrm{m}$ for easy horizontal adjustment.
With side thermal insulators to reduce heat transfers to the instrument during manual handling.

## TESA Spirit Inclinometer with Protractor and Micrometer Element

Enables the measurement of angular deviations in any position of a cylindrical or flat surface.
Instrument features: prismatic measuring face (shafts $\emptyset 17$ to 80 mm ) (DIN 877 + DIN 2276/1). Scale range: $2 \times 180^{\circ}$.
The adjustment is executed by disengaging the micrometer element by pressing in the direction indicated by the arrow. Afterwards the vial is oriented manually before engaging the micrometer element and executing the fine adjustment with the latter.
1 scale division = 1 degree.
1 division of the micrometer element $=1$ Arcmin
DIN 877

Flat measuring faces with $v$-shaped groove Vial with sensivity of $0,3 \mathrm{~mm} / \mathrm{m}$ ( $=1$ Arcmin). Error limit $=1,5$ Arcmin

Hardened and ground steel base

## ANGLE PROTRACTORS

## Angle Protractor with Digital Display

Measuring ranges $1 \times 360^{\circ}, 2 \times 180^{\circ}, 4 \times 90^{\circ}$
Large decimal or sexagesimal display
2 measuring directions
Fine setting with adjustment screw
Locking system
Scale L = 200 mm ( 300 or 500 mm available as options)
RS232 data output

## 110

00630010 Angle protractor with digital display. Supplied with a scale of $\mathrm{L}=200 \mathrm{~mm}$ OPTIONAL ACCESSORIES:
00660004 Scale 200 mm
00660005 Scale 300 mm
00660006 Scale 500 mm
00660007 Supporting base with 1 flat measuring face and 1 prismatic measuring face
00660008 Square for measuring sharp angles
01961000 Lithium battery, 3V, CR 2032
04761062 Opto-USB cable, duplex, bidirectional communication

## EAC Angle Protractor with Dial

Circular scale with needle pointer
Easy reading on main and auxiliary scales
Very low hysteresis
Precision movement with compensation for mechanical play.

ETALON Angle Protractor with Vernier Scale

Brown \& Sharpe Angle Protractor - Multiple Combinations
This angle protractor combination set can be used as a scale, depth gauge, try square, centering tool, marker or even as a spirit level.

Hardened steel. Measuring faces specially treated against scratches

With centering square

## Brown \& Sharpe Sine Bar

Suited for setting ranges from 0 to $60^{\circ}$
Sine function for establishing the angle that needs to be set on the basis of the length dimensions obtained from parallel gauge blocks.

Example for the calculation of an angle Given: $\quad H=$ height of combination gauge blocks in mm $L=$ length of $B \& S$ sine bar in $m m$

Formula: $\quad H=L * \sin (\alpha)$
$\sin (\alpha)=H / L$
angle $=\arcsin (H / L)$
Calculation for determining angle knowing $H$ et $L$ values: angle $=\arcsin (89,803 / 127)=\arcsin (0,70711)=45^{\circ}$

Hardened alloy steel

Removable front stop
